Employment

Fortunebuilders
Front End Developer
Mar. 2019 to Mar. 2020

- Technologies used: Wordpress, Javascript (jQuery, Typescript, RxJS), Angular, PHP, MySql, Symfony, HTML5, CSS3, Gulp, Bitbucket, Git
- Develop new features and maintain multiple Angular applications and Wordpress plugins.
- Collaborate with a team of four developers using Bitbucket/Git for version control and peer review.
- Create API endpoints on Symfony framework and test using Postman
- Consume RESTful web services using Http Client in Angular services.
- Update router to perform navigation between components in Angular, along with separate router for mobile version of Angular application using ng-device-detector.
- Work in concert with UI/UX designers to develop webpages from Figma mockups, establish feedback loop to ensure feasibility of design.
- Develop User Interface (UI) components with HTML5, SASS/SCSS, Bootstrap, Angular Material, JavaScript, jQuery, and AJAX, build out modular SASS library for scalable and streamlined design.

AbacusNext
Front End Web Developer
Oct. 2018 to Dec. 2018

- Technologies: Wordpress, Drupal 7, HTML, CSS, Bootstrap, Javascript, jQuery, PHP, Git, Pantheon
- Code responsive landing page variations for A/B testing, using Git and Pantheon for version control.
- Execute UX/UI and CRO updates across company sites, leveraging Google Lighthouse, Hotjar, Google Analytics, and SEMRush to monitor performance.
- Consolidate tracking data and scripts via Google Tag Manager to streamline site scripts, audit to ensure web pages meet SEO criteria.
- Resolve Drupal Salesforce-web-to-lead data integration issues within first week of employment.

Miva
Web Developer
June 2017 to Sept. 2018

- Technologies: HTML, CSS, Javascript, jQuery, phpMyAdmin, MySQL, PHP, Cloudflare
- Build new features and solutions for mid-to-enterprise level e-commerce websites, pioneer new projects such as multi-add-to-cart functionality with Miva native suggestive search.
- Code webpages from Photoshop mockups, debug and resolve website issues, and provide data & system analysis.
- Construct custom feeds per client specifications and set up cron job to run scheduled feeds.
- Implement third party integrations, including custom ERPs, Power Reviews, SearchSpring, Wordpress, and Mailchimp.
- Optimize websites for SEO, updates to .htaccess and website files to reduce page load time.

Rosemont Media
Web Project Manager
June 2015 to Jan. 2017

- Technologies: Wordpress, HTML, CSS, Google Webmaster Tools, Google Analytics, Basecamp
- Main client point-of-contact for all new website build projects throughout the website development life cycle.
- Implement client requests via Wordpress backend and leverage teleconference tools to demonstrate Wordpress capabilities to end-users.
- Prepare sitemap and .htaccess files in conjunction with website launches and monitor/update links using Google Webmaster tools.
- Identify key website traffic areas and SEO optimization opportunities to improve website performance metrics.
